

**GUJARAT TECHNOLOGICAL UNIVERSITY****BE - SEMESTER-VII (NEW) EXAMINATION – WINTER 2021****Subject Code:3170719****Date:29/12/2021****Subject Name:Distributed System****Time:10:30 AM TO 01:00 PM****Total Marks: 70****Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
4. Simple and non-programmable scientific calculators are allowed.

		<b>MARKS</b>
<b>Q.1</b>	(a) What is a distributed system? How a distributed system does projects a single system image?	<b>03</b>
	(b) Briefly discuss the issues related to distributed system design.	<b>04</b>
	(c) What is main motivation of distributed system? Explain advantages and disadvantages of distributed systems.	<b>07</b>
<b>Q.2</b>	(a) List out the various characteristics of distributed system.	<b>03</b>
	(b) What is the need for code migration? Explain the code migration issues in detail?	<b>04</b>
	(c) Discuss and compare various election algorithms.	<b>07</b>
	<b>OR</b>	
<b>Q.3</b>	(c) List out the types of System Architectures in distributed system and explain it.	<b>07</b>
	(a) Compare: Network Operating System and Distributed Operating System.	<b>03</b>
	(b) What is distributed commit and recovery in distributed systems?	<b>04</b>
	(c) Compare and contrast any 3 consistency models.	<b>07</b>
	<b>OR</b>	
<b>Q.3</b>	(a) What is flat naming and structured naming?	<b>03</b>
	(b) Enumerate various issues in clock synchronization.	<b>04</b>
	(c) Why mutual exclusion is more complex in distributed systems? Categorize and compare mutual exclusion algorithms.	<b>07</b>
<b>Q.4</b>	(a) Define IPC. What are the characteristics of IPC?	<b>03</b>
	(b) List the differences between RMI and RPC.	<b>04</b>
	(c) What is a logical clock? Explain how logical clocks are implemented in distributed system.	<b>07</b>
	<b>OR</b>	
<b>Q.4</b>	(a) What is cryptography? What is the use of cryptography?	<b>03</b>
	(b) What is Replication? Write about motivations for replication.	<b>04</b>
	(c) What is RPC? Discuss the design issues for RPC.	<b>07</b>
<b>Q.5</b>	(a) What is multicasting? List the characteristics of multicasting.	<b>03</b>
	(b) What is CORBA's common Data Representation? Explain.	<b>04</b>
	(c) Explain the common approaches to user authentication. What problems are associated with these approaches?	<b>07</b>
	<b>OR</b>	
<b>Q.5</b>	(a) Difference between Authorization and Authentication.	<b>03</b>
	(b) What is DFS? Also write the features of DFS.	<b>04</b>
	(c) Explain the DNS name service and bind implementation of DNS.	<b>07</b>

**GUJARAT TECHNOLOGICAL UNIVERSITY****BE - SEMESTER-VII (NEW) EXAMINATION – SUMMER 2022****Subject Code:3170719****Date:10/06/2022****Subject Name:Distributed System****Time:02:30 PM TO 05:00 PM****Total Marks: 70****Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
4. Simple and non-programmable scientific calculators are allowed.

**MARKS**

- |            |  |           |
|------------|--|-----------|
| <b>Q.1</b> | (a) Explain how simple client-server communication is done.                        | <b>03</b> |
|            | (b) Explain advantages and disadvantages of distributed systems.                   | <b>04</b> |
|            | (c) Explain distribution of transparency in distributed system.                    | <b>07</b> |
| <b>Q.2</b> | (a) Briefly explain scalability in distributed system.                             | <b>03</b> |
|            | (b) Discuss flat and structured naming with example.                               | <b>04</b> |
|            | (c) Explain connection-oriented message communication with the help of diagram.    | <b>07</b> |
| <b>OR</b>  |  |           |
|            | (c) Define virtualization. Explain architecture of virtual machine.                | <b>07</b> |
| <b>Q.3</b> | (a) Discuss cryptography in brief.   | <b>03</b> |
|            | (b) Give some examples of true identifiers.  | <b>04</b> |
|            | (c) Explain two phase commit protocol.   | <b>07</b> |
| <b>OR</b>  |  |           |
| <b>Q.3</b> | (a) List down requirements for distributed file system.                            | <b>03</b> |
|            | (b) Explain berkley clock synchronization algorithm.                               | <b>04</b> |
|            | (c) Explain iterative name resolution technique in detail.                         | <b>07</b> |
| <b>Q.4</b> | (a) Explain the term availability and reliability.                                 | <b>03</b> |
|            | (b) Write a short note on digital signature.                                       | <b>04</b> |
|            | (c) Explain bully election algorithms. And compare it with ring election algorithm | <b>07</b> |
| <b>OR</b>  |  |           |
| <b>Q.4</b> | (a) Define failure? List down various reasons for the occurrence of failure.       | <b>03</b> |
|            | (b) Discuss persistent and non-persistent HTTP connection.                         | <b>04</b> |
|            | (c) Explain vector clock timestamp using suitable example.                         | <b>07</b> |
| <b>Q.5</b> | (a) Define happened before relation.   | <b>03</b> |
|            | (b) Explain causal consistency.  | <b>04</b> |
|            | (c) Describe kerberos authentication with neat diagram.                            | <b>07</b> |
| <b>OR</b>  |  |           |
| <b>Q.5</b> | (a) Define names, identifiers and addresses.                                       | <b>03</b> |
|            | (b) Discuss different alternatives of client-server organization.                  | <b>04</b> |
|            | (c) Write a short note on: Distributed object-based system.                        | <b>07</b> |
