## **GUJARAT TECHNOLOGICAL UNIVERSITY**

BE - SEMESTER- VI (NEW) EXAMINATION - WINTER 2021 Subject Code:3160610 Date:24/11/2021 Subject Name: Water Resources Engineering and Hydrology Time:10:30 AM TO 01:00 PM **Total Marks: 70 Instructions:** 1. Attempt all questions. Make suitable assumptions wherever necessary. 3. Figures to the right indicate full marks. Simple and non-programmable scientific calculators are allowed. **MARKS Q.1** What is Hydrologic Cycle? Write its applications. 03 (a) Write the assumptions and Limitations of unit hydrograph theory. 04 **(b)** Discuss the engineering measures for flood control. 07 (c) **Q.2** (a) What is Infiltration? Discuss the factors affecting the infiltration rate. 03 **(b)** Explain the use of Float type rain gauge. 04 A storm with a 16.0 cm precipitation produced a direct runoff of 8.9 07 cm. The time distribution of the storm is as follows. Estimate the  $\phi$ index of the storm. Time(hr.) 2 3 4 7 8 6 Incremental 0.7 1.36 2.30 3.48 2.8 2.6 2.0 0.76 rainfall (cm) OR The ordinates of 4-hour unit hydrograph are given below. **07** Time in 8 12 16 20 24 28 32 36 40 44 Hours Ordinates 50 20 150 120 90 70 50 30 20 10 0 m<sup>3</sup>/sec Find the ordinates of 8-hour unit hydrograph for the same basin. Q.3 Define the following terms 1) Percolation 2) Base flow 3) W-index 03 (a) Discuss with neat sketch, the various storage zones of reservoir. 04 **(b)** Briefly discuss the components of a hydropower project. 07 (c) OR Q.3 Define the following terms 1) Density currents. 2) Trap efficiency. 03 3) Useful life of reservoir. **(b)** Explain Darcy's law and give its limitations 04 Discuss the various methods of controlling sedimentation of reservoirs. **07** 0.4 (a) Define the following terms 1) Aguifer 2) Aguiclude 3) Aguifuge 03 **(b)** Differentiate between Runoff River plant and storage plant. 04 Explain how the elevation area curve and elevation capacity curve are **07** (c) prepared? What is the use of this curve in reservoir planning?

Explain Design flood and Time of Concentration

Differentiate between Confined aquifer and Unconfined aquifer.

Explain Recuperation test to estimate the safe yield of an open well.

**Q.4** 

(a)

**(b)** 

(c)

1

03

04

**07** 

Q.5	(a)	Discuss channel routing in detail.	03
	<b>(b)</b>	Discuss water resources planning and its objectives.	04
	(c)	Discuss the measures to be adopted for water conservation and	07
		augmentation in water scarce regions.	
		OR	
Q.5	(a)	Discuss the factors affecting runoff in a catchment area	03
	<b>(b)</b>	Explain various methods of estimating floods.	04
	(c)	What is S-hydrograph? How it is constructed? What ae its uses?	07

## **GUJARAT TECHNOLOGICAL UNIVERSITY**

**BE - SEMESTER-VI (NEW) EXAMINATION - SUMMER 2022** 

St	ıbje	ect Cod	de:31606	10					Date:01/06/2022
$\sim$				_	_		 -	-	

**Subject Name: Water Resources Engineering and Hydrology** 

:ks: 70

## **Instructions:**

1.	Attempt all	questions.
----	-------------	------------

- Make suitable assumptions wherever necessary.
   Figures to the right indicate full marks.

	4.	Simple and non-programmable scientific calculators are allowed.	
		r · · · · · · · · · · · · · · · · · · ·	MARKS
Q.1	(a	Enlist the methods that are adopted to evaluate the rate of evaporation.	03
	(t	Describe double mass curve technique to check consistency of rain gauge station data.	04
	(0	There are four rain-gauge stations installed on certain river basin whose normal annual precipitations amounting to 850, 520, 430 and 370mm respectively. Determine the optimum number of rain-gauges in the catchment, if it is desired to limit the error in the mean value of rainfall in the catchment to 15%.	07
Q.2	(a	Explain the difference between Hyetograph and Hydrograph with sketch.	03
	(b	Describe base flow separation methods with sketch.	04
	(0	uses.	07
	(0	OR  Define "Unit Hydrograph". Wright down the assumption made in unit hydrograph theory.	07
Q.3	(a	Define:- Confined aquifer, specific yield and coefficient of transmissibility	03
	(t	Describe constant level pumping test to found the yield of an open well.	04
	(0	e) Explain groundwater occurrence with sketch and define various water bearing formation.	07
	,	OR	0.2
Q.3		How will you carry out hydrological investigation for planning of reservoir?	03
	(t	reservoir sedimentation.	04
	(0	What are various factors that affect the site selection of dam? Discuss them briefly.	07
Q.4	(a	List out components of hydropower project also draw general layout of a hydropower plant.	03
	(t	• 1 1	04
	(0	•	07

## OR

<b>Q.4</b>	(a)	Explain levees with sketch	03
	<b>(b)</b>	Explain rational method of flood estimation.	04
	(c)	What return period you would adopt in the design of a culvert on a	07
	` ,	drain if you are allowed to accept only 20% risk of flooding in the 50	
		years of expected life of the culvert?	
Q.5	(a)	Discuss various types of drought.	03
	<b>(b)</b>	Describe in detail with sketch the components of the roof top rainwater harvesting system.	04
	(a)	Explain "runoff enhancement".	07
	(c)	1	U/
		OR	
Q.5	(a)	What are the objectives of water resources planning?	03
	<b>(b)</b>	What are functional requirement of water resources planning?	04
	(c)	Describe various environmental consequences of water-resource projects.	07
